# DESIGNED TO LAST

At Roper Rhodes we pride ourselves in creating products that are made to last. Designed by our teams of specialists here in the UK exclusively for British & Irish bathrooms, each product is researched, fine tuned and tested with third party organisations before it makes it into our brochure. It's through this rigorous testing process, we are able to offer 5 or 10 year guarantees on most of our products.

SHOWER WATER SAVERS

Mount between the valve & hose for shower valves with handsets or your bath shower mixer. Mount between head & arm on your fixed shower heads. We do not recommend the use of regulators with bath taps or fillers as you will want your bath to fill as quickly as possible.

BASIN MIXER WATER SAVERS

Produce aerated water flow. Simple to install into the aerator housing of basin mixer. Available in a range of flow ratings.

BASIN TAP WATER SAVERS

Install into the inlet of the tap. One required for each tap, therefore please purchase in pairs. Available in a range of flow ratings.

STANDARD CLOSE SEATS

Anti-Bacterial Protection

Quick Release Hinges

Top Fix Hinges

Soft Close Hinges

Heavy Duty Seat

Adjustable hinge technology that simplifies the installation process of quick release seats and keeps the seat firmly in place.

EXTRA COMFORT

THE TALLER OPTION

Comfort height WCs sit several cm taller than standard WCs, making them ideal for taller, less able or elderly users. The extra height of the WC helps keep the knees at a more comfortable angle. See pages 52-55 for all comfort height WCs.

SMART DESIGN

EASI-CLEAN

RIMLESS TECHNOLOGY

HYGIENIC

MAKING LIFE A LITTLE EASIER

The Comfort Height & Debut WCs on pages 52 & 54 feature Easi-clean rimless technology. Designed with convenience in mind, germs have no where to hide with these WCs as water is projected around the bowl upon flushing, ensuring it is completely clean.

CLOSE COUPLED SENSOR FLUSH KITS

With a simple wave of the hand, hygienic, contactless flushing is now here for close coupled WCs.

- Two sizes are available depending on the size of the flush button hole in the cistern lid.
- The button kits have been designed to retro-fit to existing WCs which have paddle operated flush valves.
- For cisterns which have pneumatic or cable operated flush valves, or where the button "screws in" directly to the flush valve, then the flush valve will also need to be swapped to our INST02043 valve which has a 2" base.
- Use INST02041 to upgrade a Debut Close Coupled WC page 52
- Use INST02042 to upgrade a Comfort Close Coupled WC page 54
