The Unico System®

TAKE CONTROL OF YOUR HOME CLIMATE

AN EXCITING NEW PRODUCT COMING TO THE UK 2019-2020

DELIVERED TO YOU BY

Helping you to select the right product for the right application

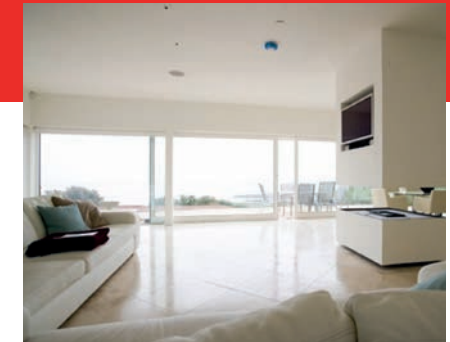

www.bellplumbing.co.uk

Air Conditioning & Heating without compromising your home design

Trusted in more than 500,000 homes in the USA, the UNICO System offers an alternative solution to traditional heating & cooling design. Moving towards new technologies and improved air quality, the UNICO System fulfils all your COMFORT requirements.

TAKE CONTROL OF YOUR INSTALLATION

TO SEE A HEATING & COOLING DESIGN ON PAPER IS ONE THING, TO ACTUALLY INSTALL AND **NOT SEE IT IS ANOTHER**

So...what does it mean?

Small-duct central heating & air conditioning managed by your preferred control option:

Basic Thermostat

Touch Screen Thermostat

Smart Wi-Fi Thermostat

Sample Thermostats are for illustration purposes only

- Instant Climate Control
- One Simple Solution
- Even Temperatures
- Virtually No Draughts
- No Unsightly Radiators
- Furniture Optimisation
- Energy Efficient

Belgravia, Period Residential Property

The owners of this prestigious London property tasked their project manager to find the most discreet heating and cooling system which would not compromise the new interior and architectural features of this period property.

After researching "discreet air conditioning", he discovered the Unico System which was perfect for this new living space.

The Barn, Historic Property

Unico was specifically chosen by the client to provide a heating only solution for all rooms on the upper floor which would not compromise the architectural integrity of this historic building.

Due to the age and construction of the property, the installation of a conventional heating system was not possible and the owners wanted to maximise the limited wall space available for furniture.

Exmouth, Contemporary Self Build

Built on the beachfront at Exmouth, this property has a Unico System at its core and was featured on the Grand Designs television programme.

With a large frontage constructed from glass, the property needed a comfort system that would provide responsive and effective cooling and heating.

With an open plan design and few barriers between floors, the ultra-quiet high velocity small-duct System delivered a draught-free environment with no hot or cold spots.

At the heart of the Unico System is our air handler which contains the blower housing module and fan and coil module.

- Simple Lightweight Modular Design
- Ideal for Self-Build Projects
- Compatible with Traditional Boilers
- Works Best with Renewable Technology
- Flexible Outlet Positioning

Discreet round or slotted outlets to match any decor.
