# SENSOR FLUSHING

## Sensor Dual Flush Plate

**Sensor Dual Flush Plate - Black**  
210(w) x 137(h)mm  
Flush Plate TR9016 £129.00

Go for an ultra-contemporary option with our sleek, black glass-fronted sensor dual flush plate. The lightest touch on the plate is all that is required to initiate the flush, and the plate lights up to indicate activation.

The sensor plate is best for use on Tavistock wall hung WC frames or the in-wall concealed cistern, and requires 4 AA batteries which will last around a year under normal domestic conditions. The plate allows easy access to change the batteries when required and has a manual override.

## Contactless Dual Flush Sensor

**Contactless Dual Flush Remote Sensor Kit**  
Use with concealed cisterns  
Sensor CSFK £107.50

The contactless flush sensor kit is compatible with pneumatic concealed cisterns from Tavistock, and is best used within furniture. It provides a touchless flush, with just a wave of a hand.

The Sensor works using capacitive sensor technology to detect a change in the electromagnetic field. A short wave of the hand in front of the sensor activates the reduced flush, whilst holding your hand up slightly longer triggers a full flush. It is powered by 4 AA batteries which will last around a year under normal domestic conditions.

The sensor can be mounted behind a back to wall WC unit fascia, or under a worktop or tiled wall near the cistern. A discreet black decal is included to indicate sensor location if desired.
