Honeywell Home

The
perfect fit.

Heating controls for any boiler and any system

Honeywell Home

For decades Honeywell Heating Controls have been recognised as the market leading brand of timers and thermostats, zone valves and TRVs in the UK market.

In 2018 the company that makes these products was separated from the Honeywell corporation and is now a stand-alone NYSE traded company called Resideo.

The products that you know and love continue to be available; made in the same British and European factories, to the same quality, by the same teams. You will notice the updated Honeywell Home branding and Resideo company name appearing on our websites, brochures and products.

With a history of creating innovative, reliable solutions, our mission is to provide technology that delivers comfort, security and simplicity to the places people call home.

As we enter the digital age, Resideo is at the forefront of the next wave in consumer technology: The smart, connected home.

84%
Heating and hot water

53%

savings on your energy consumption

Heating controls play an important part in ensuring there is control over one of the most expensive systems in the home.

84% of household energy consumption is generated through heating and hot water. Home owners need to ensure that they have a full set of modern heating controls that provide time, temperature and individual room control for the whole house - this will save up to 53%* on their energy consumption.

Two channel 7 day programmer	ST9400C1000
2 zone 7 day programmer	ST9500C1015

Wireless Time & Temperature Control

Sundial RF² Pack

- A two-way wireless receiver built into the timer avoiding the need to wire extra receivers into the heating system
- Products wirelessly pre-bound in the box
- Fits on industry standard back plate
- A pack to cover the majority of systems
- Just fit the timer and everything else is wirelessly enabled on the system

| SUNDIAL RF2 PACK	APPLICATION
Sundial RF² Pack One - Y9120H2009	Ideal for adding a room thermostat to combi-boilers and single heating zones
Sundial RF² Pack Two - Y9420H1008	Ideal for adding a room thermostat to an existing system that has stored hot water
Sundial RF² Pack Three - Y9420S2005	Ideal for adding a room thermostat and cylinder thermostat to new and existing systems
Sundial RF² Pack Four - Y9120W1000	Ideal for adding a hot water timer and cylinder thermostat to new and existing Sundial systems, or upgrading a gravity hot water system
Sundial RF² - Pack Five - Y9520Z1007	Ideal for providing two heating zones

Flow Control

The perfect fit.

Our range of two and three port valves are the premier models used in the domestic central heating market.

- Tried and tested quality
- Made in Europe since 2010
- Removable head and replaceable motor
- Durable rotating ball provides tight valve shut off
- Reliable 'Syncron' motor
- Quiet operation and minimal power consumption
- Manual lever for filling and draining the system
- Variety of sizes available

DESCRIPTION	PRODUCT CODE
22mm Standard Zone valve	V4043H1056
28mm Standard Zone Valve	V4043H1106
Replacement Head for zone valve	40003916-001

S & Y Plan Installer Packs.
The perfect fit.

S PLAN PACK

ST94000

Twin channel programmer for sophisticated time control of both heating and hot water
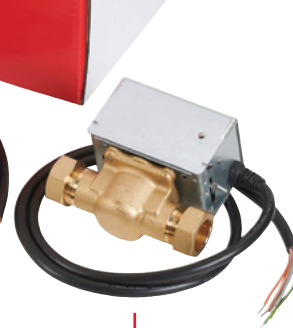

T6360

Mains voltage room thermostat for simple room temperature control

L641A

Cylinder thermostat for hot water temperature measurement

V4043

Independent zone valves for Heating and Hot water

ErP Class I +1%

The S & Y Plan Packs are designed to provide **independent time and temperature control of both heating and hot water circuits in fully pumped central heating installations.**

They provide the time, temperature and flow products for a typical domestic heating system and ensure that full boiler interlock is achieved for both heating and hot water in the property.

DESCRIPTION	PRODUCT CODE
S Plan Pack	Y609A1045-1
Y Plan Pack	Y609A1029-1

V4073A

The V4073A Valve controls the flow of water in domestic central heating systems, where both radiator and hot water cylinder circuits are pumped

Y PLAN PACK

T6 – The right way to offer smart heating
The perfect fit.

- The T6 smart thermostat offers sophisticated easy to use, whole house and room temperature control and will also control hot water timing (on some models).

- Control the T6 thermostat from a smartphone or tablet

- Built in geo-fencing location capabilities make the system even smarter

- Combine two T6 smart thermostats to create two heating zones in the property

- The T6 models work with all the major smart home devices – Alexa; Google; Apple & IFTTT

WORKS WITH alexa | Works with IFTTT | works with the Google Assistant | Works with Apple HomeKit | BOILER PLUS | ErP Class V +3%

evohome – The modern way to zone a property
The perfect fit.

You wouldn't control all your lights from one switch... why would you do it for your heating?

- The evohome multi-zoning system allows the easy installation of up to 12 individual heating zones
- The system also controls hot water time and temperature
- Underfloor heating areas can be controlled via the evohome system allowing central control of both radiators and underfloor heating
- Combi-boiler evohome applications can be designed without zone valves
- Thousands of properties (small and large) now have sophisticated zone control thanks to evohome
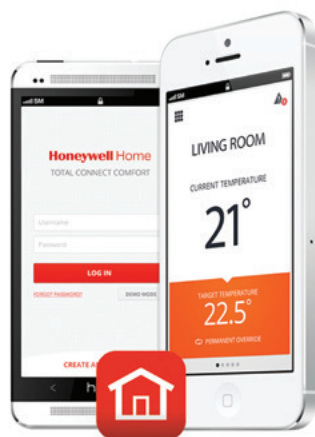

WORKS WITH alexa   Works with IFTTT   works with the Google Assistant   BOILER PLUS   ErP Class VIII +5%

8mm Angled & 8 & 15mm Push fit, straight and remote sensing options also available

Our main values are our people, our quality supported by technology

Our Timers, programmers and room thermostats are manufactured in Newhouse Scotland

Pressure reducing & bypass valves

The perfect fit.

Pressure Reducing Valve.

D04FM Pressure Reducing Valve

- Designed to protect household appliances against excessive supply pressures
- Water consumption can be drastically reduced
- Water flow noise and over-pressurisation damage is avoided
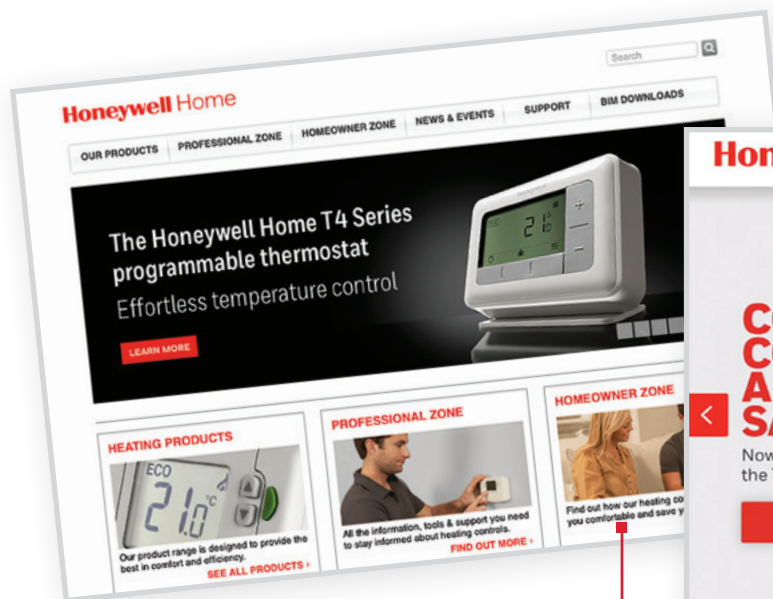

Automatic Bypass Valve.

DU144/5 Automatic Bypass

- Reduces system noise and maintains an even system pressure
- Ensures constant flow through boiler
- Lockable set pressure prevents inadvertent adjustment

DESCRIPTION	PRODUCT CODE
22mm Straight Bypass Valve	DU144A1001
22mm Angled Bypass Valve	DU145-3/4B
Pressure Reducing Valve - 15mm compression fittings	D04FM-1/2ZGC
Pressure Reducing Valve - 22mm compression fittings	D04FM-3/4ZGC
